## Haz-Mat/ Decontaminable Sked Stretcher Fact Sheet

*The HMD Sked Stretcher: a revolutionary concept in stretcher design*

- |                            |  |
|----------------------------|--|
| <b>Product description</b> | ➤ A rescue stretcher designed to perform rescues in a contaminated area, yet is light weight, durable, easy to use, and decontaminable |
| <b>Size</b>                | ➤ Rolled up - 9 inch diameter x 36 inch length<br>➤ Laid flat - 3 feet x 8 feet  |
| <b>Weight</b>              | ➤ 11 pounds with straps attached   |
| <b>Material</b>            | ➤ Low density E-Z glide non-absorbing polyethylene plastic   |
| <b>Temperature range</b>   | ➤ Begins to melt 450° F to 500° F<br>➤ Usability to 120° below zero without becoming brittle   |
| <b>System components</b>   | ➤ HMD Sked stretcher body<br>➤ Removable strap set   |

This stretcher is designed for use in contaminated areas where it is difficult to maneuver because of the level "A" suits. It is easy to use and allows faster patient loading with less effort. Patients can be decontaminated while on the HMD Sked. It is designed for dragging, sliding or carrying. It is NOT SAFE FOR ROPE RESCUE OR VERTICAL HOISTING.
