The Choice of U.S. Army MEDEVAC

DEDICATED TO THE "WARFIGHTER MEDIC™"

Made in USA

EXTREME MEDICINE®

“Good Medicine in Bad Places™”

Skedco Helicopter Medical Bag Set

FAILURE ON THE BATTLEFIELD IS NOT AN OPTION™

STATEMENT OF NEED: Combat casualty/Medical Evacuation (CASEVAC™/MEDEVAC) are the “realities of war”. Approximately 15% of all combat casualties that survive initial wounding die before reaching definitive care from causes that are potentially correctable.

This percentage can be greatly reduced through dynamic First Responder Self Aid and Buddy Aid and CASEVAC™/MEDEVAC training combined with equipping MEDEVAC aircraft (AC) with bulkhead mounted medical bags to contain necessary equipment and supplies to treat all patients being transported in the MEDEVAC aircraft (AC) while enroute to a higher level of combat health support.

These bags are sold as a set
NSN: 6545-01-538-6249
SK-11500,
or seperately.

Skedco Helicopter Medic Bag
NSN: 6545-01-538-8494
