SKEDCO COMBAT UTILITY BELT

DON'T GET CAUGHT WITH YOUR PANTS DOWN™

Capabilities

STATEMENT OF NEED/DESIRED CAPABILITY: Standard issued uniform utility belts along with after-market Rigger type belts lack function when used under combat conditions where time is critical and seconds count. Battlefield and tactical rescue scenarios require personnel to put on and secure their utility trousers in a moments notice. The development of a NEXT GENERATION combat utility belt durable enough to endure the rigors of combat with consideration of the basic functions of a belt, and I might include your body as a necessity, not a convenience!

GENERAL FEATURES:

- Mil Spec Construction—Proudly made in the USA and constructed with the SKEDCO 3000 lb. tensile strength aluminum side-release black buckle using 1.75" Mil Spec Type 13 webbing with 7,000 lb. tensile strength sewn with 138 polyester thread using a Double "W" stitch pattern with bartacks at each end.
- **Durable**—Capable of surviving the rigors of extreme environments to include combat and tactical rescue operations throughout the world.
- **Strong**—Features a minimum 3000 lb. breaking strength and can be used as an expedient load securing strap.
- **Practical**—Designed to be used with all styles of military combat/utility uniforms and available in matching color patterns to include black, coyote brown, foliage green, and olive drab.
- **Functional**—Designed with the end-user in mind to include ease of weaving on all standard uniforms along with rapid and repetitive opening and closing during routine and extended use under all environmental conditions.
- **Affordable**—Cost effective and affordable to the end-users as an after-market upgrade to the standard or issued utility belt.
- **Guarantee**—Backed by the 100% SKEDCO Guarantee.

SPECIAL FEATURES:

- Hardware—Light-weight SKEDCO buckle
- Rapidly secured without having to re-weave the buckle (Just pull up your trousers, snap the SKEDCO buckle, and "Drive On" with your mission.
